#### Rules for the FIS Alpine points

##### FIS Points protection in case of pregnancy

##### 4.6.1.4 Pregnancy

The protection status starts as soon as the medical certificate is received and confirmed by FIS (or after her last start) until the birth of the child. The expected date of birth of the child must be written in the medical certificate. After the birth of the child the protection status is still valid for a maximum of 9 (nine) months. Then it expires if the National Ski Association does not apply in writing to FIS for prolongation of the FIS points protection status mentioning the exact medical reason.

#### Medical Certificate

##### 4.6 Injury Status

##### 4.6.1 Registration

When a competitor gets injureds himself and applies for the single penalty, the National Ski Association must apply to the FIS as soon as possible or latest 30<sup>th</sup> April for the approval using the official form and submitting a medical certificate. The medical certificate must report in detail the kind of injury and the period of recovery. This official form and medical certificate are only valid for one season. (World Cup: see World Cup Rules art 21.2)

#### International Competition Rules (ICR)

##### Responsible Finish area

##### 601.3.9.1 The Chief of Finish Area

The Finish Area Coordinator is responsible for coordinating the various requirements in the finish area to deal with the demanding, pre, during and post-competition activities. Responsibilities include construction and coordination of the mixed-zone, television and press interviews, winner ceremonies, doping control facility and the coordination with security for these areas.

The collaboration is between the LOC's Finish Area Coordinator and persons managing the above areas, together with the FIS personnel handling equipment control, teams, accreditation and access, media, ceremonies and doping controls, from the planning stages through to implementation during the event.

#### Hand Timing

611.3.2 In the case of a failure of the main electronic timing system (system A), the results of the electronic back-up system (system B) will be valid as per art. 611.2.1. For the Olympic Winter Games, FIS World Ski Championships and FIS World Cup, a synchronised electronic timing system with printers, connected to the starting gate and to the photocells at the finish is obligatory.

In case of a failure in the lines of the timing system between start and finish, this back-up system will allow the calculation of the times to 1/100ths of a second.

In the case that ~~calculated net time~~ time of day from either system A or system B are not available for a competitor, the calculated ~~net manual time~~ of day as per art. 611.3.2.1 will be considered valid.

#### 611.3.2.1 *Utilisation of times taken by hand*

Hand times may be used in the official results after a correction has been calculated.

Calculation of the correction:

~~Subtract the electronic time from the time taken by hand for~~ Calculate the difference between the times taken by hand and the electronic times of the 105 competitors starting before the missing time, and the 5 starting after or if necessary, the 10 nearest competitors. If there are not 10 times before, complete the calculation with the remaining times after the missed time.

The sum of the 10 time differences is divided by 10 and rounded up or down (0.044 -> 0.04, 0.045 -> 0.05) to give the correction which must be applied to the hand time of the competitor without an electronic time.

#### 611.3.2.2 *Photo Finish*

A Photo Finish System may be used to determine a competitor's finish time. In case of a failure of system "A" and "B", and where the competition has been recorded by the Photo Finish System, this time must be used in place of hand-timing. ~~using a correction factor.~~

~~The correction factor is the difference between the time taken by the Photo Finish System and the electronic times (where possible) of the 3 competitors before the missed time. Where there is not 3 previous competitors then the time of a competitor(s) immediately after the missed time can be used.~~

~~The sum of the 3 (or less) time differences divided by 3 (or less) is applied to the photo finish time of the competitor without electronic time.~~

The photo finish time is taken when any part of the competitor's body first crosses the finish line. The photo finish result is to be provided to the Jury only.
