

PRECISIONS SPEED SKIING

CHANGES TO THE INTERNATIONAL COMPETITION RULES (ICR)

EDITION 2016/2017

Precisions Speed Skiing 2016/2017

Changes to the International Competition Rules (ICR), Edition November 2016

Approved by the FIS Council, Oberhofen (SUI), November 2016

INTERNATIONAL SKI COMPETITIONS RULES (ICR) 2016

- 1232.2.2 The timing zone
The last 25 or 100 meters of the competition track will be used as the basis for measuring the speed of each competitor. The timing zone ~~for tracks with a potential of >210kph~~ for WC and WSC tracks must be 100 meters. The length has to be measured very precisely, and frequently controlled to ensure that speed measurements remain valid. The OC is responsible for certifying the accuracy of the measurement to the TD.
- 1232.5.2 Timing zone: red pennons every meter. In addition, the end of the zone must be extended by red marking on both side and marked across its entire width by a red coloured line on the snow. This line must be at least 50 cm broad, and clearly visible from the competition track.
