FIS NORDIC WORLD CHAMPIONSHIPS OBERSTDORF 2021

COVID 19 PROTOCOL SHORT SUMMARY & EXPLANATIONS

I. GENERAL INFORMATION

I. GENERAL INFORMATION

FIS Passport

- Always upload your test results and whereabouts to the FIS Passport

HOW TO ENTER GERMANY

ENTRY TESTS TO ENTER GERMANY

QUARANTINE AND EXCEPTIONS

RISK AREAS

ENTRY REQUIREMENTS

All persons traveling to Germany have to register before their arrival in Germany at <https://www.einreiseanmeldung.de> and carry proof of registration with them on entry.

There are three different categories of risk areas you might be travelling from

- Low or normal risk areas
- High Risk Areas
- Virus variant of concern areas (Mutant Virus Areas)

Relevant for your category are your whereabouts of the last 10 days before travelling to Germany

ENTRY REQUIREMENTS

a. Entering from a (normal) risk area

- you need to have a negative test taken **before** (not older than 48hrs) arrival **or** immediately (within 48hrs) **after** arriving in Germany/ Bavaria
- no quarantine due to exception for Oberstdorf 2021
- Even if it says quarantine at www.einreiseanmeldung.de, do not worry, you are excepted from quarantine rules as you are accredited for a sports event
- Please note: Only in this case (travelling from low risk area), the entry test in Oberstdorf can be used as entry test to enter Germany

ENTRY REQUIREMENTS

b. Entering from a high risk area

- You need to have a negative test taken **before** (not older than 48hrs) arrival in Germany/
Bavaria
- no quarantine due to exception for Oberstdorf 2021

ENTRY REQUIREMENTS

c. Entering from a variant of concern area

- Travel ban for all persons traveling from a mutant virus area
- No arrivals from those areas are accepted in Germany
- Make sure to avoid mutant virus areas at least 10 days before traveling to Oberstdorf

ENTRY REQUIREMENTS

General Information concerning travel

- The proof of a negative test result must be provided on paper or in an electronic document, in each case in German or English or French.
- Please check Robert Koch Institute website on a regular basis for info on risk areas, travel restrictions, test requirements, etc.

- Persons which had <15 Min. face-to-face contact (cumulative)
- no prolonged exposure (p. eg. less than 30 minutes) inside a room with a high dosage of infectious aerosols
- Contact $\leq 1,5$ m with wearing a mouth-nose-protection continuously of both persons

SARS-CoV-2-coordination centre of the LOC

- Information of the person concerned
- Laboratory will inform the health authorities
- Transfer of the personal data to the health authority

Health authority

Domestic isolation for at least 10 days.

The responsible local authority will make decisions about the necessary orders and decides about a possible end of the isolation.

SARS-CoV-2-coordination centre of the LOC

- Investigation of the namely registration
- Transfer of the personal data to the health authority

Health authority

Domestic quarantine for 14 days.

Testing on day 10 of the quarantine can shorten quarantine to 10 days when a negative test result is given.

SARS-CoV-2-coordination centre of the LOC

- No further investigation
- Transfer of the personal data to the health authority
- No further testing of asymptomatic contact persons Category II necessary
- Reduction of the contacts with other persons for 14 days
- Health surveillance: no special measures

- Positive tested persons as well as contact persons category I can NOT take part at the event.

Measures in case of symptoms

- Immediate contact to the health authorities and testing
- Isolation according to the order of the health authority
- Naming of all contact persons of the last two days before the beginning of the symptoms

GENERAL INFORMATION
COVID19 BEHAVIOUR
LONG TIME POSITIVE
VACCINATED
TREATMENT IF TESTED POSITIVE
