1 Introduction

A COVID-19 safety concept approved by the authorities (federal, cantonal and communal) is required for the staging of a sports event of this proportion.

The organising committee of the 92nd International Lauberhorn Races Wengen 2022 intends to provide a safe and successful event.

This COVID-19 safety concept and its consequent field of activities are based on and subject to the following overall guidelines:

- National, cantonal und communal directives (mainly guidelines and directives of the Swiss Federal Office of Public Health FOPH) and its regular updates
- Guidelines and directives of the Fédération Internationale du Ski FIS and its regular updates (FIS COVID-19 Prevention Guidelines, FIS COVID-19 World Cup Risk Management and Testing Protocol)
- Swiss frame directives to sports events (BASPO and Swiss Olympic, 13-09-2021)
- Swiss Ski Basic Safety Concept and its regular updates
- Cooperation and mutual support between Wengen and Adelboden World Cup races and other organisers

This safety concept covers the time periods of the World-Cup events in Wengen:

- Period of preparations and constructions, arrival of staff
- Event (arrival of teams and officials, practise, races, departure of teams and officials)
- Period of dismantling, departure of staff

Due to changing environment conditions this safety concept undergoes continuous adaptations. Substantial changes will be communicated to superior authorities. An up to date version of the safety concept is published on the official website: [Welcome to the Ski World Cup Lauberhorn in Wengen | Internationale Lauberhornrennen Wengen](#)

2 Aims of the COVID-19 safety concept Wengen

By introducing this safety concept, the organisers of the 92nd International Lauberhorn Races Wengen 2022 will secure the following objectives:

- The health and safety of all those involved, athletes, staff, volunteers, officials, media representatives, members of the Swiss army and civil defence are a top priority
- The processes and rules of this concept are clear and comprehensible. They should not impede the smooth running of the event and they are meant to give the LOC and thus the respective departmental heads security in their approach
- The processes and rules are continuously adapted according superior directives

3 Structure of the COVID-19 safety concept Wengen

The COVID-19 safety concept contains the following important components and attachments (see full list of attachments under chapter 12):

Main part:

- COVID-19 safety concept Internationale Lauberhornrennen Wengen 2021

Attachments:

- Swiss-Ski Basic Safety Concept (15-10-2021)
- Plans of specific areas and pathways divided and allocated according colour groups
- Documents and directives by the Swiss Federal Office of Public Health: [Measures and ordinances \(admin.ch\)](#)

4 Conclusions of the COVID-19 safety concept Wengen

This safety concept leads to the following general conclusions:

- Only persons providing a valid COVID-19 certificate (vaccinated, recovered, tested) and an official ID card will be granted access to the event [SR 818.101.26 - Ordinance of 23 June 2021 on Measures during the Special Situation to combat the COVID-19 Epidemic \(admin.ch\)](#)
- Foreign certificates (vaccinated or recovered outside the Schengen area) will first have to be transcribed into a Swiss certificate
[National COVID certificate application platform \(admin.ch\)](#)
- The planning committee aims to minimize the number of accredited personnel to the level necessary for a smooth running of the event
- Due to the fact, that isolation and quarantine has the potential to cause gaps in the ranks of personnel every member in an important position must appoint and continuously inform a substitute
- Volunteers who are themselves considered to be at risk of severe COVID-19 symptoms are recommended to refrain from volunteering during the pandemic period. According to the FOPH the following persons are particularly vulnerable:
[People at especially high risk \(admin.ch\)](#)
- In the interest of sport and with respect to the organizing committee and the entire population, all those present commit themselves to implementing and complying with the necessary measures in a spirit of solidarity and with a high degree of self-responsibility
- All important documents are published on the official Lauberhorn website and on the Lauberhorn staff app
- Persons surrounding the event will be informed of safety measures and directives

5 COVID-19 organisation Wengen

5.1 COVID-19 organisation before and after event

- COVID-19 delegate: Urs Allenspach M.D.
0041 79 646 81 12
u.allen.w@gmail.com
Deputy: Markus Sinsel M.D.
- Organising committee: Andreas Mühlheim
0041 33 856 66 66
andreas.muehlheim@lauberhorn.ch
Deputy: Daniel Kaufmann OK, Adrian Lauener OK

Tasks:

- Preparation and implementation of safety concept
- Adaptation of safety concept in case of changed superior directives
- Connecting link of LOC to Canton/FOPH
- Point of contact for teas
- Support of arriving teams (establish contact to authorities, support by Swiss Ski)
- Responsible for triggering the contact tracing
- Responsible for implementation of current regulations
- Contact to other World Cup LOCs
- Implementation of correct certificate checks

5.2 COVID-19 organisation during the event (FIS Event Task Force)

- COVID-19 coordinator Wengen: Urs Allenspach M.D. (deputy: Markus Sinsel M.D.)
- Local organising committee: Urs Näpflin (deputy: Andreas Mühlheim)
- Representative FIS: Markus Waldner
- Representative Swiss Ski: Walter O. Frey M.D.

Tasks:

- Implementation of safety concept during event
- Implementation of current regulation and directives
- Connecting link of LOC to Canton/FOPH
- Implementation of procedures and measures in case of symptomatic accredited person
- Implementation of procedures and measures in case of COVID-19 positive person

6 Separation of individual groups

In accordance with FIS and Swiss-Ski guidelines, all persons involved in a World Cup event are divided into groups:

Red FIS-Covid Testing Protocol FIS-Passport	All persons who are travelling with or are in direct contact with the World Cup team. <ul style="list-style-type: none"> • Athletes, forerunners, coaches, support staff, service staff, closest management of the athletes • FIS • camera crews in the start house, finish area and in the leader box (close distance to athletes) 	
Race Organisation 3-GGG*	Grey Centre team «all access»	All persons with possible close contact to members of other colour groups <ul style="list-style-type: none"> • certain members of the LOC • certain members of FIS / Swiss Ski • certain persons of host broadcaster (from group yellow) • certain persons in the start, finish and leader box area • certain members of the medical and rescue team
	Subgroup <100 persons (see below)	All persons involved in the organisation, on the track, in the start/finish area or at other locations of the event: <ul style="list-style-type: none"> • volunteers • race officials • emergency organisations • civil defence and Swiss army • accredited contractors
Media 3-GGG*	All accredited media professionals <ul style="list-style-type: none"> • host broadcasters • journalists and reporters from television/newspapers/online portals/radio • photographers • technicians 	
Spectators 3-GGG*	Spectators	

* 3-GGG indicates: fully vaccinated or recovered (positive PCR > 14 days < 365 days) or tested

Group Blue is divided into subgroups of less than 100 members:

1. Before and after event
 - Start
 - Downhill part 1
 - Downhill part 2
 - Downhill part 3
 - Downhill part 4
 - Downhill part 5

- Downhill part 6
 - Finish area
 - Slalom start to above finish area
 - Construction finish area
 - Construction Wengen village
 - Head office
2. During Event (in addition to above named subgroups)
- Centre team
 - LOC and head office
 - Security / police
 - Slipping crews / referees

The red group must be strictly separated from the others and procedures must be planned so that this group does not mix with others.

The members of the “centre team” are in fact part of group Blue. As an exception they may have to cross into another colour groups zone and during this time they are obliged to wear a FFP2 mask without valve (Base Safety Concept Swiss Ski). They underlie a different intensified testing protocol.

The different colour zones are defined and shown on the zone maps in the attachments. The traffic flows are directed in such a way that the colour groups do not mix with each another. All entries into and exits from a colour zone will be recorded by using an app.

The LOC keeps a list with an overview of all accredited persons.

7 Protection measures against transmission of infections

7.1 General protection measures

The following basic measures are mandatory:

- wash and disinfect your hands as often as possible
- keep a distance of 1.5m
- wear masks
- stay away in case of symptoms

In all important locations posters and signposts inform about these basic measures.

Hygiene

In private as during the event a good hand hygiene is of utmost importance. Wash your hands regularly and disinfect them.

Keep your distance

If possible, keep a distance of 1.5 meters or more. Social distancing is even more important indoors.

Protective masks

Group Red: masks are generally compulsory on the entire site and in all venues. Exceptions: during competition (athletes), eating and drinking as soon as seated (all).

Group Grey: wearing masks is mandatory indoors (not suspended by certificate). Wearing masks outdoors is not compulsory but highly recommended. As soon as a member of this group enters “zone red” mask are compulsory indoors and outdoors (FFP2). Exceptions: strenuous physical activity, eating and drinking as soon as seated.

Group Blue: wearing masks is mandatory indoors (not suspended by certificate). Wearing masks outdoors is not compulsory but highly recommended. Exceptions: strenuous physical activity, eating and drinking as soon as seated.

Group Yellow: wearing masks is mandatory indoors (not suspended by certificate). Wearing masks outdoors is not compulsory but highly recommended. Exceptions: strenuous physical activity, eating and drinking as soon as seated.

There are designated disposal boxes for masks in all important locations.

7.2 Specific protection measures

Health Questionnaire

Only healthy and symptomless persons are registered and accredited. Persons with COVID-19 symptoms must stay away. Everybody seeking accreditation must answer the FIS Health Questionnaire in best knowledge (except group Red: by FIS passport). During the event, every registered member has to answer the health questionnaire on a daily basis. If one of the answers indicates a risk, notification to the superior or via hotline is compulsory.

Ahead of the event:

	no	yes
Have you had any cold symptoms (cough, runny nose, sore throat, difficult breathing) during the last 14 days?		
Have you had any or the following symptoms during the last 14 days: fever, chest pain, headache, nausea/vomiting, diarrhea, loss of taste or smell?		
Have you been in contact with someone with a proven infection with COVID-19 during the last 14 days?		
Have you been in quarantine during the last 14 days (excluding quarantine based on travel regulation/boarder crossing)?		
Have you tested positive to COVID-19 by PCR test during the last 14 days?		

During the event:

	no	yes
Do you have a fever of 38.0°C or higher?		
Are you coughing more than usual, especially dry cough?		
Do you have shortness of breath?		
Do you have loss of taste or smell, stuffy nose, abnormal fatigue, unusual headache or vomiting and diarrhea?		
Have you tested positive to COVID-19 by PCR test during the last 14 days?		

COVID-19 Testing Centre Wengen

The Xundheitszentrum Wengen offers a COVID-19 testing point (situated outside the Wengen Clinic, please follow the signposts).

Appointments may be received via the following pathways:

Covid-19 Testpoint Wengen (deutsch)

Covid-19 Testpoint Wengen (english)

Covid-19 Testpoint Wengen (français)

Covid-19 Testpoint Wengen (italiano)

COVID-19 Testing Protocol

Group Red: A negative COVID-19-RT-PCR-Test (within the last 48h ahead of the accreditation) is mandatory for all members of Group Red (FIS Passport includes the test results and the FIS Health Questionnaire). Persons with symptoms should not travel to Wengen and will not be accredited. In case an accredited member of Group Red gets symptomatic during the event, a COVID-19 Test will be taken. Please check for further steps under the next section "*Symptoms during the event*". The costs of these tests and any consequent isolation or quarantine shall be borne by the person being tested (except tests ordered by the LOC outside the usual testing protocol).

When collecting the team's accreditations, the team captain confirms that each of his team members is in possession of a valid COVID-19 certificate (vaccinated, recovered >14days <365days, tested). This COVID-19 certificate has to be presented at each check point (including an official identity card). Foreign certificates (vaccinated or recovered outside the Schengen area) will first have to be transcribed into a Swiss certificate [National COVID certificate application platform \(admin.ch\)](https://www.admin.ch/national-covid-certificate-application-platform). Vaccination booklets are not accepted.

Red Group members without vaccinations (including recovered and C-19-antibody-positives) have to undergo daily COVID-19 Ag-tests (validity 24h). Self testing or group testing doesn't show on certificates and is not accepted.

Race organisation: members of this group are informed about the fact, that a valid COVID-19 certificate (vaccinated, recovered, tested) is mandatory to seek accreditation (subject to change without notice). Persons with symptoms should not travel to Wengen and will not be accredited (FIS Health Questionnaire). In case an accredited member of the race organisation gets symptomatic during the event, a COVID-19 test will be taken. Please check for further steps under the next section "*Symptoms during the event*". The costs of this test and additional costs of consequent isolation or quarantine will be borne by the LOC.

The COVID-19 certificate has to be presented at each check point (including an official identity card). Foreign certificates (vaccinated or recovered outside the Schengen area) will first have to be transcribed into a Swiss certificate [National COVID certificate application platform \(admin.ch\)](#)

Vaccination booklets are not accepted. Obligation to present a valid COVID-19 certificate implies that persons without vaccinations or recovered >365 days or C-19-antibody-positives > 90 days have to undergo regular COVID-19 tests (validity: Ag-test 24h, PCR test 72h). Self-testing or group testing doesn't show on certificates and is not accepted.

Centre team (Group Grey):

A negative COVID-19-RT-PCR-Test (within the last 72h ahead of the event) is mandatory for all members of Group Grey. Considering the general and local COVID-19 situation at the time of the event and the fact of a small group allowed to cross different colour zones if necessary, the LOC and COVID-19 Task Force may make further testing procedures mandatory. The costs of these tests and additional costs of consequent isolation or quarantine will be borne by the LOC.

Media:

Members of the media group have to present a valid COVID-19 certificate in combination with an official identity card to be accredited. The certificate has to be kept valid throughout the event and presented with an ID. at each checkpoint. Persons with symptoms should not travel to Wengen and will not be accredited (FIS Health Questionnaire). In case an accredited member gets symptomatic during the event, a COVID-19 test will be taken. Please check for further steps under the next section "*Symptoms during the event*". The costs of these tests and costs of consequent isolation or quarantine will be borne by the person being tested (except tests ordered by the LOC outside the usual testing protocol).

The COVID-19 certificate has to be presented at each check point (including an official identity card). Foreign certificates (vaccinated or recovered outside the Schengen area) will first have to be transcribed into a Swiss certificate [National COVID certificate application platform \(admin.ch\)](#)

Vaccination booklets are not accepted. Obligation to present a valid COVID-19 certificate implies that persons without vaccinations or recovered >365 days or C-19-antibody-positives > 90 days have to undergo regular COVID-19 tests (validity: Ag-test 24h, PCR test 72h). Self-testing or group testing doesn't show on certificates and is not accepted.

Symptoms during the event

Each registered person has the duty to check himself for symptoms every day, if suspicious go into self-isolation and notify his superior including the COVID-19 Task Force via hotline as soon as symptoms occur. The Task Force will decide on the next steps to take according the provisions and regulations set out by the cantonal authorities.

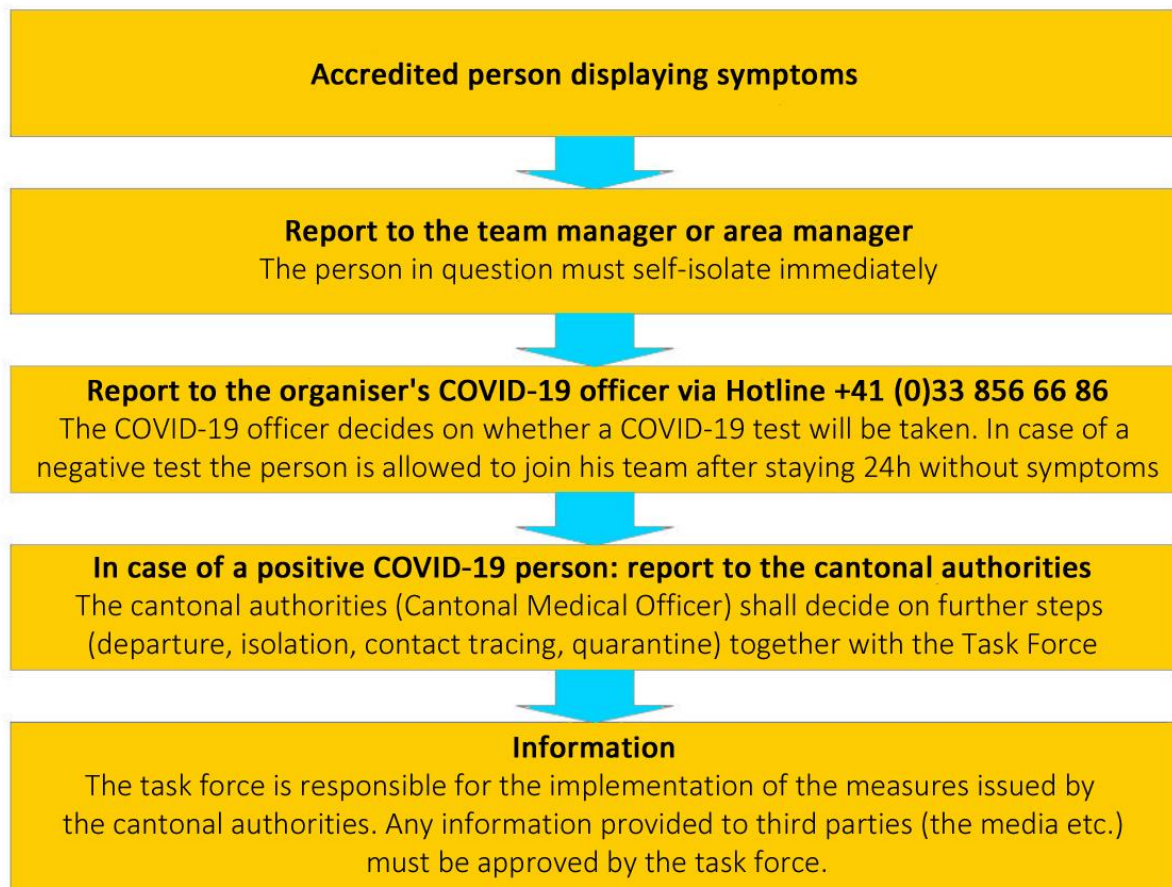

Main Symptoms are (Federal Office of Public Health FOPH):

- Respiratory illness symptoms (sore throat, cough (usually dry) shortness of breath, chest pain)
- High temperature
- Sudden loss of sense of smell and/or taste

Other symptoms may include:

- Headache
- General weakness, feeling unwell
- Aching muscles
- Gastrointestinal symptoms (nausea, vomiting, diarrhoea, stomach ache)
- Head cold
- Skin rash

In case of symptoms:

Positive COVID-19 Test

In case an accredited person tests positive for COVID-19 the Event Task Force will decide on further steps taking into account the national, cantonal and communal directives. Without a contradicting decision by the task force the following procedures take place:

Isolation: the accredited and COVID-19 positive person must undergo isolation. In case of important or severe symptoms the patient must be consulted by the team doctor or at the local health facility (Xundheitszentrum Wengen +41 (0)33 856 28 28). The LOC provides further space for isolation in case the rooms reserved by the teams are not sufficient. The costs for isolation/quarantine of members in Group Red or Yellow are borne by the COVID-19 positive person.

The “FIS-COVID-19 World Cup Risk Management and Testing Protocol” in its version of 26-12-21 implies in the case of more than one COVID-19-positive member of Group Red, that mass testing within this group should be prepared. The LOC will organise the logistics behind this protocol.

Contact Tracing: seamless tracing of close contacts is a central task of the LOC (contacts without protective measures within 72h ahead of the positive COVID-19 test, cumulative duration of more than 15 minutes in a distance below 1.5 meters). The contact tracing starts with the notification to the Cantonal Medical Officer and is performed by the cantonal authorities (support by LOC).

Three pathways/devices will support the contact tracing:

- individual history of the COVID-19 positive tested person
- following the information from the LOC’s attendance checking app, where every entry and exit into the different areas are recorded
- following the information in the Swiss COVID-19 App

Those persons with significant contact must undergo quarantine.

End of isolation: in case of a symptomless patient the isolation takes 10 days. To terminate the isolation a symptomatic patient must stay without symptoms for 48h (minimum remains 10 days)

External Communication (according to FIS-COVID-19 Communications Policy):

1. No external communication may be made by the team/individual until the FIS Event Task Force has assessed the circumstances
2. Once the assessment is made, official information firstly to the designated contact for the positive case to inform about the communication flow
3. The first external information will be made through the FIS Official Communication system. It will not contain names of individuals involved, or details. It is meant strictly to inform that a person has tested positive and any necessary next steps involved
4. Should timing be appropriate, and all parties agree, the information can also be communicated by the FIS Race Director at the Team Captains Meeting to facilitate additional communication to the key stakeholder group, namely the athletes
5. Following any announcement at a TCM, the FIS Official Communication will still be sent and information about the person involved if this is cleared
6. At this time, the teams/individuals may also put out information to the media with more detail about the positive case, if desired
7. Following the Official Communication, FIS and the LOC will only answer media inquiries that pertain directly to the competition and any impact on the calendar. All health and team-related questions will be referred to the team/individual/group involved
8. Local Organising Committees, National Ski Associations and any other involved stakeholders should not make any public statements about any calendar changes until the FIS Official Communication has been sent

Important: these guidelines refer only to the external communication of a positive test. Informing the local authorities will follow the governmental guidelines in place at the time and in the region.

8 Organisation of the Wengen event during COVID-19 pandemic

8.1 Access to the event

It is the intention to keep the Wengen ski resort open during the event. The Wengen LOC and the Jungfrauabahn agree on the following strategy:

Trains

For the transport between Lauterbrunnen – Wengen – Allmend separate trains or wagons and access spaces will be offered to colour group Red.

The safety concept of the Swiss train companies applies to the Wengen event too. [Schutzkonzept für den öffentlichen Verkehr unter COVID-19: Rahmenbedingungen und Inhalte. \(sbb.ch\)](#)

The ski guests and tourists will be served with separate trains and wagons. Access to the Wengen ski resort will be diverted via Grindelwald Grund Terminal and the V-Bahn.

Chair lifts

The chair lifts «Lauberhorn», «Wixi» and «Innerwengen» stay open for public transport throughout the Wengen event. The LOC will not occupy the chair lift «Lauberhorn» during its usual public opening hours. Access to the chairlift “Wixi” will be separated for the colour groups Red/Blue/Yellow and the public.

The chair lift «Innerwengen» will be open to the public during the practice period. On race days the access can be closed for ski guests if necessary. Access to the chairlift “Innerwengen” will be separated for the colour group Red.

The cantonal police will support the control of the public space and secure it.

All these measures are subject of change on short notice, if laws or official orders change.

8.2 Security staff and crowd control

Security staff will have a larger spectrum of activity (certificate checkpoints). Over all more workload is expected and planning should be adapted accordingly.

8.3 Transfer to event area

Spectators will follow the concept agreed between Jungfrau Railways and the Wengen LOC: the object is to relief the transport line between Lauterbrunnen and Wengernalp (detour via Grindelwald-Grund). Different ticket categories will have defined access routes.

8.4 Event area

Race course

Outside the ticket areas spectators don't have to show their COVID-19 certificates.

Girmschbiel Gold-Card / Lauberhorn ticket / finish area event zone / World Cup Dörfli

Access is only permitted with a ticket, valid COVID-19 certificate and official identity card.

8.5 Control of certificates

Access to the event area is only permitted by showing a valid COVID-19 certificate. This rule applies to everybody: group Red, members of the LOC, voluntaries, media and spectators. The certificates will be checked at every entry point.

8.6 Catering in the event area

Access to catering areas (take away) is permitted by showing a valid COVID-19 certificate. If indoors seating and catering are offered, access will be limited to 2-GG certificate holders (vaccinated or recovered).

8.7 Meetings

The number of participants physically present at meetings will be limited to an acceptable minimum (according directives by the FOPH and its updates). FFP2 mask are mandatory for all persons attending these meetings.

Team Captains Meeting

The Team Captains Meeting will take place at the Wengen Movie Theatre. By limiting the number of present participants enough space will be generated. The room will be ventilated and aired regularly. Tables, chairs and other surfaces are cleaned and disinfected regularly.

Eligible participants present at Team Captains Meeting:

- FIS: number of FIS participants will be determined by FIS
- Teams: 1 participant / team
- LOC: 3 persons present
- Race office: 1 person present
- Media: 1 person present
- Livestream: 1 person present
- Host Broadcaster: 1 participant
- COVID-19 delegate: 1 participant (depending on situation)

The team captains meeting will be accessible to all outside participants via online livestream.

Task Force Meeting

The COVID-19 Task Force meets 30 minutes ahead of the Team Captains Meeting at the Wengen Movie Theatre (Monday 10-01-22 19.30h; Tuesday until Saturday 16.30h)

Media Conference

No media conferences with physical presence will be held.

Award Ceremonies

Award ceremonies will be held on Friday and Saturday evening at World Cup Dörfli (on Sunday the award ceremony will be held exclusively in the finish area). Participants will be limited.

9 External facilities and providers

National and cantonal safety regulations valid at the time and the currently valid safety concept of the relevant facility or provider apply to the use of external facilities and providers such as mountain railways, cable cars, chair lifts, accommodation (hotels/holiday homes, etc.), restaurants etc.

The LOC will contact the individual organisations in advance and check the feasibility of the protective measures in place.

9.1 Hospitality

As a rule, the safety concept of GastroSuisse applies.

Closed rooms are regularly ventilated. Tables, chairs and other surfaces are cleaned and disinfected after each meal and group.

9.2 Hotels

As a rule, the safety concept of HotellerieSuisse applies.

If there are other hotel guests in the same hotel, they must be separated from the Red Group. During meals, group Red, different teams and regular hotel guests may not be mixed. Teams are required to wear protective masks during their stay in the hotel and when entering rooms. All employees are required to wear masks.

Each team reserves quarantine rooms where suspected cases can be isolated.

The LOC will contact the hotel staff in advance and check the feasibility of the protective measures in place.

9.3 Mountain railways, cable cars and chair lifts

As a rule, the safety concept of "Seilbahnen Schweiz" and "Jungfraubahnen" valid at the time applies. All mountain railways in the ski area are subject to the rules and regulations issued by FOPH. Thus, all persons must wear masks when using closed mountain railways and cable cars.

The Wengernalpbahn will offer separate wagons to group Red. Access zones are divided accordingly. The chair lifts "Wixi" and "Innerwengen" will secure separate access and transport to group Red.

10 Communication

10.1 Communication towards national teams

The LOC Wengen informs the national teams via the FIS calendar about this COVID-19 safety concept. Significant changes due to new local guidelines and directives will be communicated accordingly.

10.2 Approval of COVID-19 safety concept

For approval, this COVID-19 safety concept will be submitted to the cantonal authorities.

10.3 Communication towards LOC Adelboden and Kitzbühl

The LOC Wengen will get into contact with LOC Adelboden and LOC Kitzbühl and send them this COVID-19 safety concept to allow a smooth transfer of teams between these events. Swiss Ski will coordinate the process.

10.4 Internal information

All heads of department acquaint themselves in advance with the applicable protection measures based on the present Safety Concept World Cup and the integrated appendices.

10.5 Information on site

At important and prominent points throughout the entire event site, FOPH information boards and posters will be installed, pointing out the applicable safety guidelines. The race speaker will make regular announcements about the guidelines and measures and pass on important current information. This channel can be used for both internal and external stakeholders. The purpose of this channel is to ensure that no crowds form at entrances and exits.

10.6 Communication towards media

Communication towards media takes place by the Task Force and the LOC according to the communication concept valid at the time.

11 Responsibility

This COVID-19 safety concept and its consequent field of activities are based on and subject to the following overall guidelines:

- National, cantonal und communal directives (mainly guidelines and directives of the Swiss Federal Office of Public Health FOPH) and its regular updates
- Guidelines and directives of the Fédération Internationale du Ski FIS and its regular updates (FIS COVID-19 Prevention Guidelines, FIS COVID-19 World Cup Risk Management and Testing Protocol)
- Swiss-Ski Basic Safety Concept and its regular updates

This concept will be approved by Swiss Ski, the communal and cantonal authorities and FIS.

The responsibility for implementing and monitoring the defined measures lies with the LOC Wengen. The LOC reserves the right to expel persons who do not comply with the protective measures from the event site and to withdraw their accreditation.

All participants in the Ski World Cup Wengen must sign a declaration before receiving accreditation that the present safety concept and the relevant colour appendix have been read and understood. This ensures individual instruction and correct implementation. The declaration to be signed is attached at the end of the relevant colour appendix.

Participants in the event are obliged to implement the prescribed measures consistently and to report any symptoms of illness immediately to the COVID-19 Hotline.

The safety concept and its regular updates are published online and accessible to everyone (official website, Lauberhorn App, FIS calendar).

The operators of external facilities / providers are responsible for the corresponding general conditions and safety concepts of the respective facility / provider.

All participants are to adhere to the safety concept in the spirit of solidarity and with a high degree of personal responsibility.
