1. Description, dates and venue

The Winter Jam arena is built in the landing of the great Ski Jumping hill of Falun Lugnet. There have been previous events in the arena such as the Battle, Clash of Nations and now Winter Jam is back. Previous Winter Jam was held in the Olympic Arena of Stockholm Stadion from 2005-2011. In Stockholm the jump was built out of scaffolding, now we will build it entirely out of snow. The model of the jump that has been done is with a 10m wide kicker, a 14 m high landing with 22m wide knuckle. This jump will ensure a great and safe competition pushing the sport forward.

The event will be in combination with a snowmobile Big Air invitational as well as music acts and parties. The sports arena is within less than 10 min walk from the hotel, Scandic Hotel Lugnet. See sketch.
